

Create desktop videos and more with ALLCapture. Screen recording software to capture your screen in real-time.

ALLCapture lets you record anything on your screen in real-time, even fluent movements such as online conferences and CAD-3D simulations can be professionally recorded. Various functions (balloons, notes, etc.) and special effects (elastic band, spotlight effects, etc.) offer an easy way of editing your recordings. Multiple export formats are available (Flash, EXE files, ASF and video files for the publication on CD, DVD, VCD and SVCD).

Why ALLCapture is what you need:

Internet videos of any kind

- Create demos, tutorials, videos, screencasts, and more
- Enrich websites, intranets, portals and forums with internet videos

Presentation of company, products and services

- Present your company, your products or your services with small Flash and other videos
- Create video presentations to use on conferences, trade shows and exhibitions

Efficient support solutions

- Create video clips and how-to videos for staff, customers and users

Video conferences

- Record and document video conferences

Private use

- Create private Internet videos, e.g. from your last holidays
- Record all screen activities in real-time
